

# The Lonesome Lowdown Long-gone Outbound Scootertrash Blues by Mark Tiger Edmonds

A Book Review By Roger Wiles #32797

**CHANNELING MARK TWAIN**—THE original wandering tourist—with subtle overtones paying respect to past highway scribes, philosophers and the ones who were just plain lost and loving it, Mark Tiger Edmonds has released his fourth book about life, the road and ever-entertaining humans found along the way. *The Lonesome Lowdown Long-gone Outbound Scootertrash Blues* picks up the endless highway tune with the addition of a new main squeeze, “Tall Girl,” new-but-old Airhead BMWs, road stories, new and old dogs, and life from the incurable Luddite’s viewpoint.

Now retired from the pursuit of filling impressionable wooly-headed urchins with the wonders of good literature, and the miracle of cogent and competent writing, Tiger has more time to add to his million-plus Airhead BMW miles. Harking back to the days of yore within the BMW motorcycling community, the delights and hazards of traveling around on a motorcycle firmly rooted in the past, readers will revisit sunny and rainy days aboard venerable Airheads over-laden with rally gear. Some readers will actually find themselves in Lonesome and many of us will see shadows of ourselves through the looking-glass of the past.

With chapters like; “Old Cops, New Cops, Fame(?) and New Time Religion,” and “More Riding in the Rain and More Angry Women,” readers can revisit the simpler era of moto-touring, replete with kluge repairs, encounters of the human kind and

the peace found on the road.

For riders both old in experience as well as those new to our ranks, Lonesome is a great read, particularly when sipping a refreshing beverage while relaxing in a rest stop or a city park along your own roadway of experience and adventure.
